NICOLÁS MUÑOZ

Seeking an entry-level IT position where I can apply my knowledge of web development technologies, problem-solving skills, and a passion for computer science to help your company succeed. As a tech-savvy individual who has been using computers extensively since childhood, I have developed a strong foundation in solving software problems and a natural curiosity for learning new technologies.

I have completed several online courses and certifications in web development, including HTML, CSS, and JavaScript, which have provided me with a solid foundation in front-end web development. Additionally, I have developed a broad understanding of computer science concepts such as algorithms, data structures, and programming paradigms. I am eager to continue learning and expanding my skills, and am excited about the opportunity to do so within your company. With a strong work ethic, positive attitude, and a willingness to go the extra mile, I am confident that I can be a valuable asset to your team.
